

## **Technical Service Veterinarian (Companion Animal) / Western Canada**

On behalf of an international pharmaceutical company specialized in animal health, I am looking to fill the following position

### **Technical Services Veterinarian (companion animals) / Western Canada**

#### **Responsibilities:**

- Ensure technical support for the company companion animal health products to company personnel and veterinary customers through timely transfer of information and technical trainings.
- Organize and deliver appropriate technical training sessions on the Company products for internal customers including territory managers, product managers, regional managers and customer service personnel.
- Provide assistance in the development of communication materials according to marketing plans.
- Assess and develop the territory managers' knowledge and skills for the product line by providing field support. This will be accomplished in collaboration with regional managers.

#### **Qualifications:**

- Doctorate in veterinary medicine (DVM), license to practice in Canada
- Good knowledge of Microsoft Office software • A minimum of 3 years of experience in veterinary practice
- Willing to travel about 40% of the time across western provinces

**Compensation:** 125K-135K + bonus (15%) + benefits + car allowance

**Location:** Calgary, Edmonton, or Vancouver

**Send resume / questions to :**
