

## **Looking for a New Addition to our Clinic Family.**

Do you want to practice gold standard medicine? Do you want to have a voice in your work place? Are you an outdoor enthusiast who values work-life balance? Do you want to become part of a close-knit work family? Then our clinic might be for you!

We have an opportunity available for a new veterinarian and a new RVT to join our team in the coming months. We have a flexible start date and are offering flexible working hours, so that this job can fit your life. These positions are long-term part- or full-time, at a brand new boutique-style hospital servicing dogs, cats and exotic pets. We would also be more than willing to mold the job for the ideal person so that we can suit you best – we just want to find the perfect fit.

Our goal is to provide gold-standard medicine, and to have fun while doing it. We are open-minded owners with an approachable and welcoming team, searching for an individual who wants to be engaged in the workplace. We value our team members opinions and suggestions, as we are an equal opportunities employer who does not adhere to the normal hierarchy of the veterinary profession, and instead engage in a team-based democratic approach.

Our hospital has the full range of IDEXX blood machines including in-house Coags and VetStat, IDEXX digital xrays, dental xrays, a brand new GE Logiq US, a BOVIE electrocautery unit, an Incubator, brand new Shorline kennels, cages and cat condos, brand new dental machine, Hot Dog and Bair Hugger, multiple anesthetic monitors and extensive equipment for exotic pet care. We are always open to adding new things and would welcome input from our new employees. We also have a 1-bedroom apartment for staff space, complete with an on-call bedroom and treadmill. We offer a very competitive salary, along with benefits and uniform allowances. Our clinic rotates emergency work with 6 other clinics in Kamloops, meaning minimal out-of-hours work, but enough to keep things interesting. Come and enjoy the new-ness!

If that isn't enough, the city of Kamloops is a hub of everything outdoors. Lake/river life? Check. Skiing/Boarding? Check. Climbing and mountain biking? Check. Endless hiking trails? Check. The city itself has that small town charm with a lovely downtown centre sporting many locally-owned businesses. This area is also known for its breweries and wineries. Kamloops is also very centrally located, meaning you will be close to everything else that beautiful BC has to offer!

If this fresh take on the veterinary profession is for you, then we would love to hear from you. Come and be a part of our team, make yourself heard, improve your practice and start loving your job again!
