RACE APPROVED SESSION FOR 1 CE CREDIT

Next-Level Intestinal Parasite Detection

During this session, Dr. Danny Joffe will review a new, next-level fecal PCR panel, highlighting the benefits for the clinician and the patient.

PCR tests are more effective at identifying parasites' DNA and RNA when compared to traditional identification methods. Additionally, PCR tests give the clinician more information about the parasite, allowing for better patient management.

DATE

Tuesday, November 22, 2022
