

Life Cycle of Your Veterinary Career

A veterinary career is not a straight path - it's a series of evolving stages, each with its own challenges, opportunities, and rewards.

This presentation explores the natural "life cycles" that veterinarians experience, from the early days of education and first practice, through to growth from early stages of incorporation to a mature practice and tax considerations during this journey.

- Identify the key stages of a veterinary career and the transitions between them
- Discuss the Canadian tax system and differences between employee, self-employed and incorporation
- Explore the tax and investment advantages of corporations when in practice
- Plan for your retirement and navigate succession and estate planning (I believe you are presenting more on this. We aren't really touching much on succession/estate planning as this can be a very big piece)
